TECHNICAL SKILLS

Programming Languages: JavaScript, PHP, Python,

Web Technologies/Frameworks: HTML, CSS, VueJS, NodeJS, Bootstrap

Databases: Firebase, MySQL

Design and Prototyping Tools: Figma (mockups, funnel design, wireframes and prototypes)

Embedded Systems: ESP32 and RaspberryPi Development, Circuit Design, IoT integration

Computer Hardware & Maintenance: Computer Assembly, Basic Troubleshooting

Networking: Cisco Networking Fundamentals (Routing & Switching, TCP/IP, Packet Tracer)

Version Control: Git, Github

Developer Tools: Postman, Netlify, Trello

Operating System: Windows, Linux (Debian, Ubuntu)

SOFT SKILLS

- Proactive and Adaptable
- Analytical Problem Solving
- Collaborative Development
- High Attention to Detail
- Technical Communication
- Openness to Feedback and Continuous Improvement

EDUCATION

Polytechnic University of the Philippines, Sta. Mesa, Manila

Bachelor of Science in Computer Engineering | March 2026

Polytechnic University of the Philippines, Sta. Mesa, Manila

Diploma in Computer Engineering Technology | September 2023

PROFESSIONAL EXPERIENCE

Social innovations Technology Inc., Quezon City

April 2023

UI/UX Designer Intern

- Assisted in conducting user research sessions with three stakeholders regarding manual alumni tracking, **translating qualitative feedback** into actionable design requirements.
- Collaborated with cross-functional teams to **map the customer journey** for private institutions, optimizing the subscription and onboarding flow for the Listy platform.
- Contributed to design process of the **product's first landing page using Figma**, showcasing and marketing key business features to enhance visibility and client engagement.
- Participated in defining **user stories and archetypes** to align design decisions with the specific goals and motivations of alumni office administrators, ensuring a seamless user experience.

PROJECTS

PharmAssist

Jan 2026

Frontend Developer / UIUX Designer

- Designed the wireframe and created a working prototype in Figma.
- Established brand identity and visual design for the web app.
- Implemented the frontend design of each navigation pages (dashboard, medicine history, medicine scheduler, and account view)
- Contributed to feature development while maintaining regression-free UI/UX through iterative testing and design validation.

EchoSense: A Smart Wearable for Deaf Individuals and Hearing-Impaired

July 2025

Embedded System Engineer

- Verified OpenAI API connectivity through Postman testing.
- Engineered core functionality (Transcription system, keyword detection system, and sound proximity system) using python.
- Assembled and soldered hardware components, performing unit tests to validate each feature.
- Coordinated with the Persons with Disabilities Affairs Office to evaluate device usability and acceptance.

Tips&Eats

Feb 2025

Frontend Developer / QA Tester

- Designed an intuitive UI UX prototype in Figma.
- Conducted unit tests on each feature for ensuring the quality of product.
- Assisted in resolving frontend bugs and performance issues.
- Built the interface using vanilla web technologies (HTML, CSS, JavaScript).

SMABS: Smart Blind Stick for Navigation and Obstacle Detection

March 2023

QA Tester

- Executed rigorous stress testing of the Arduino-based firmware to ensure haptic and audio feedback triggered correctly upon obstacle detection.
- Identified and documented system bottlenecks, particularly in the latency of location delivery, to improve overall system reliability.
- Conducted systematic testing of the ultrasonic sensor logic to confirm a consistent 4-meter detection range, achieving a 4.38/5 accuracy rating from respondents.
- Validated the reliability of the SIM808 GSM/GPS module, ensuring that SOS emergency coordinates were accurately transmitted to the cloud and guardian devices.

LEADERSHIP

Start-UP Seminar Conference, PUP Sta. Mesa

May 2025

Documentation Committee Head

- Collaborated with cross-functional committee heads to orchestrate seminar workflows and strategize event execution for maximum engagement.
- Led the team members and delegate their roles (editors, photographer, videographer, audience loggers) aiming to capture stage highlights, producing marketing content that increased Facebook visibility.
- Helped create marketing materials and event recap videos, which boosted Facebook page visibility and improved brand presence.
- Handled sponsor highlights and audience engagement reports to give partners useful insights and support future seminar promotions.
